The Loch Ness Wallet

Fourteen years ago, Japanese tourist Nobu Matsuda dropped his wallet into the waters of Loch Ness in Scotland. His Passport, his car keys, his credit cards, and his money were lost in 150 meters of water. This week, the phone rang in Mr. Matsuda's apartment in Tokyo and a Scottish policeman told him, "Sir, your wallet was found! It was discovered last Sunday by some scientists in a submarine looking for the Loch Ness monster!" Mr. Matsuda said, "The whole thing is absolutely amazing. Apparently, my wallet and its contents were mailed to me already. I should get them soon. I can't believe it!"

6. Nobu Matsuda must have thought _____.
- a. he'd never get his wallet back
 - b. the Loch Ness monster would eat his wallet
 - c. Scottish policemen were very talented
 - d. A submarine would find his wallet

7. Mr. Matsuda's wallet _____.

- a. is with the police in Scotland now

- a. get a massage to relax
 - b. go to Scotland to get his stuff
 - c. get a new wallet and passport
 - d. receive the contents of his wallet soon

Read the paragraph and answer the questions (11-15)

1. Schizophrenia is in reality a cluster of psychological disorder in which a variety of behaviors are exhibited and which are classified in

various ways. Though there are numerous behaviors that might be considered schizophrenic, common behaviors that manifest themselves in severe schizophrenic disturbances are thought disorders, delusions, and emotional disorders.

2. Because schizophrenia is not a single disease but is really a cluster of related disorders, schizophrenics tend to be classified into various subcategories. The various subcategories of schizophrenia are based on the degree to which the various common behaviors. Are **manifested** in the patient as well as other factors such as the age of the schizophrenic patient at the onset of symptoms and the duration of the symptoms. Five of the more common subcategories of schizophrenia are simple, hebephrenic, paranoid, catatonic, and acute.

3. (A) The main characteristic of simple schizophrenia is that it begins at a relatively early age and manifests itself in a slow withdraw from family and social relationships with a gradual progression toward more severe symptoms over a period of year. (B) Some suffering from simple schizophrenia may early on simple be **apathetic** toward life, may maintain contact with reality a great deal of the time, and may be out in the world rather than hospitalized. (C) over time, however, the symptoms, particularly thought and emotional disorders, increase in severity. (D)

11. The passage states that schizophrenia

- is a single psychological disorder
- always involves delusions.
- Is a group of various psychological disorders
- Always develops early in life.

12. The phrase "**manifested in**" in paragraph 2 is closest in meaning to

- internalized within
- demonstrated by
- created in
- maintained by

13. Which of the sentences below best expresses the essential information in the highlighted sentence in paragraph 3?

- simple schizophrenia generally starts at an early age and slowly worsens
- all types of schizophrenics withdraw from their families as their disease progresses.
- Those suffering from simple schizophrenia tend to move more and more slowly over the years.
- It is common for simple schizophrenia to start at an early age and remain less severe than other types of schizophrenia.

14. The word "**apathetic**" in paragraph 3 is closest in meaning to

- Sentimental
- Logical
- Realistics
- Emotionless

15. Look at the four squares () that indicate where the following sentences could be added to paragraph 3.

At this point, hospitalization will most likely be deemed necessary.

Where would the sentences best fit.

- a. (A)
- b. (B)
- c. (C)
- d. (D)
